WORK EXPERIENCE

● Full Stack Software Developer

ADESSO   01.11.21 - current

> Worked as lead full stack developer on two web applications for a large client in the automotive sector.
> Planned, designed, developed and deployed new features together with the client.
> Successfully migrated Angular frontends to latest major versions.
> Maintained the CI/CD pipeline.
> Developed and deployed software in an agile environment.
> Analysed and resolved defects.
> Wrote clean, flexible, readable, unit tested code in the fronted and backend.
> Refactored legacy code to be cleaner and more performant.
> Implemented Restful web services.
> Liaised with the client and many other departments as needed.

● Full Stack Software Developer

AKKA   01.04.19 - 30.09.21

> Developed feature sets for an internationally used cross-platform web application using Angular, Typescript, SCSS/SASS, Ionic, and Xcode.
> Developed features sets for a large scale web portal using Liferay, Java EE, JSP, Javascript, Typescript, CSS, Oracle SQL, Docker, and WSL.
> Liaised closely with the client when refining, developing, and delivering new feature sets.
> Facilitated knowledge transfer between team members.
> Onboarded new team members
> Worked in pair programming sessions.
